

Beard Growth Kit — Persona Profile

Persona - Beard Growth Kit

Man Matters beard category masterdoc | Persona mapping for acquisition and creator briefs

Audience principle

The category should feel useful, not insecurity-led. The user may have low, uneven, or patchy beard growth, but the communication should never make him feel incomplete. The winning tone is: if you want to work on your beard, here is the right science-backed routine.

Persona Split

Persona | Age | Share | Primary Need | Acquisition Role

Persona 1 - The First-Time Grower | 18-22 | 35% | Belonging and first proof | Makes the kit feel normal, safe, and peer-approved.

Persona 2 - The Patcher | 22-27 | 45% | Completion and mechanism clarity | Converts the highest-intent user who has tried oils or random grooming fixes.

Persona 3 - The Late Resolver | 28-35 | 20% | Permission to act and safety reassurance | Converts the cautious user through doctor-led, alcohol-free, personalised framing.

Persona 1 - The First-Time Grower

Block | Content

JTBD | He wants proof that low or patchy beard growth can be worked on without feeling judged or sold a gimmick.

Mindset | First-time buyer, peer-driven, wants to know if people his age are using it.

Trigger | Real progress, creator proof, simple routine, alcohol-free reassurance.

Barrier | Fear of harshness on face, fear that it will not work, impatience in month one.

RTB | 5% Minoxidil for beard growth, alcohol-free formula, 4.3 rating, 840K units sold, 3-4 month routine.

Creative tone | Young, casual, confidence-building, not shame-led.

Best narratives | Peer Proof / Confidence, Before-After, Problem Solution.

Persona 2 - The Patcher

Block | Content

JTBD | He wants to fill uneven patches and understand why previous beard oils or grooming fixes did not solve the actual issue.

Mindset | Research-led and comparison-driven. He will respond to mechanism, proof, and routine clarity.

Trigger | Minoxidil works from the roots; beard oil mainly softens existing hair. The 3-step kit gives topical activation, nutrition support, and weekly absorption support.

Barrier | Skepticism after trying oils, confusion between generic Minoxidil and beard-specific alcohol-free Minoxidil, stopping early after baby hairs appear.

RTB | FDA-approved 5% Minoxidil for beard growth, Beard Gummies, Derma Roller, Calendula, Pentavitin, clinically tested, backed by experts.

Creative tone | Clear, confident, science-made-simple, never over-medical.

Best narratives | Myth Busting, Before-After, Product First, Problem Solution.

Persona 3 - The Late Resolver

Block | Content

JTBD | He wants permission to start without feeling late, old, or embarrassed.

Mindset | Cautious and credibility-driven. He trusts doctor-led and product-page proof more than trend pressure.

Trigger | Alcohol-free, beard-specific formula; doctor-recommended; personalised by age, concern, root cause, and skin type.

Barrier | Safety anxiety, irritation concern, wasting money, assuming it is too late to start.

RTB | No Side Effects | Clinically Tested, backed by experts, 10 lakh+ men served, alcohol-free Minoxidil, personalised recommendation.

Creative tone | Calm, expert-led, reassuring, practical.

Best narratives | Product First, Problem Solution, Peer Proof / Confidence.

Peer Proof / Confidence | Make the routine feel normal, safe, and used by people like him. | Persona 1, Persona 3 | Real users are following a simple beard routine without shame or gimmicks. | 4.3 rating, 840K units sold, 1.5K reviewed / 1462 reviews, 10 lakh+ men served.

Before-After | Show visible progress while setting realistic expectations. | Persona 1, Persona 2 | Patchy or low-growth areas can look fuller with 3-4 months consistency. | First month may show no visible result; baby hairs in month two; thickening in month three; fuller look after three months.

Myth Busting | Explain why beard oil alone often does not solve low or patchy growth. | Persona 2 | Beard oil can soften existing hair; Minoxidil works from the roots on follicles. | FDA-approved 5% Minoxidil for beard growth, alcohol-free formula, Derma Roller improves absorption.

Product First | Make the kit look simple, aesthetic, and easy to follow. | Persona 2, Persona 3 | A complete 3-step routine: apply Minoxidil, take Gummies, Derma Roller once a week. | Beardmax 5% Minoxidil + Beard Gummies + Derma Roller; Calendula and Pentavitin; science-backed.

Problem Solution | Start from low, uneven, or patchy beard and resolve with the right kit. | All personas | Low or patchy beard can have root causes; Man Matters helps identify the right routine by age, concern, skin type, and cause. | Personalised solution, doctor-recommended, no side effects / clinically tested, alcohol-free, backed by experts.

Bucket | Split % | Major Narratives | Outcome | Persona Nuance

Persona 1 - The First-Time Grower | 35% | Peer Proof / Confidence, Before-After, Problem Solution | Belonging | Peer-driven and first-time buyer. Lead with real progress, alcohol-free reassurance, and simple 3-4 month expectation setting. Avoid shame.

Persona 2 - The Patcher | 45% | Myth Busting, Before-After, Product First, Problem Solution | Completion | Research-led and science-driven. Explain why oils did not solve the patch and how Minoxidil reaches the follicle. Address not stopping early.

Persona 3 - The Late Resolver | 20% | Product First, Problem Solution, Peer Proof / Confidence | Permission to act | Cautious and credibility-driven. Use doctor-to-camera or expert-led framing. CTA is find the right kit for age, concern, cause, and skin type.

3. Narrative Buildout

Narrative 1: Peer Proof / Confidence

Use when the creative needs to lower hesitation. Show that other men have started the routine, stayed consistent, and seen progress without making the viewer feel judged.

Hooks:

"Mere age ke guys ke results dekh ke start kiya. 3-4 months consistency ka game hai."

"Patchy beard ke liye random hacks nahi, proper routine follow kar raha hoon."

"First month visible nahi tha, but routine stop nahi kiya."

Narrative 2: Before-After

Use when the creative has proof visuals. Keep the transformation believable and timeline-led. Always normalize month one.

Hooks:

"First month mein kuch visible nahi tha. Month 2 mein baby hairs start hue."

"Patchy beard tha. 3rd month tak beard fuller lagne lagi."

"Before-after tabhi fair hai jab 3-4 months consistency dikhe."

Narrative 3: Myth Busting

Use when the viewer has tried beard oil, home remedies, or generic grooming. Do not mock those choices; explain the mechanism difference.

Hooks:

"Beard oil existing beard ko soft karta hai. Minoxidil follicles pe kaam karta hai."

"Patch fill karna hai toh shine nahi, follicle activation chahiye."

"Agar oil se patch same hai, product wrong nahi. Mechanism wrong tha."

Narrative 4: Product First

Use when the creative is visual, aesthetic, and music-led. Make the kit look easy to follow and native to Reels/TikTok.

Hooks:

"My 3-step beard routine for the next 3-4 months."

"Apply Minoxidil, take gummies, derma roll once a week. Simple."

"Patchy beard? This is the routine I am staying consistent with."

Narrative 5: Problem Solution

Use when the ad starts with low, patchy, slow, or uneven beard growth. Keep it constructive and science-backed, not insecurity-led.

Hooks:

"Low beard growth ka solution random oil nahi, right routine hai."

"Patchy beard ke liye Man Matters ka 3-step kit: Minoxidil, Gummies, Derma Roller."

"Find the right kit for your age, skin type, concern, and cause."

4. Treatment Journey

Item | Guidance

1st Month | User might not see visible results. Minoxidil is stimulating beard follicles and preparing for baby hair growth. Do not let the user panic here.

2nd Month: New Baby Hairs | Minoxidil works from the roots and starts introducing new baby hairs with consistent use.

3rd Month: Thickening | New baby hairs begin looking thicker. Beard Gummies and Derma Roller support stronger, fuller-looking growth.

After 3 Months | New beard hairs become thicker and denser. This helps cover patches and gives a fuller beard look.

Communication rule | Always normalize the first month. The biggest risk is churn before results become visible.
